

Time nHand & Expense nHand for Dynamics SL

EMPOWER your **PROFESSIONAL SERVICES** team with mobile **TIME** and **EXPENSE** entry

Time nHand and Expense nHand gives your **professional service employees** complete time and expense entry capability **right in the palm of their hand** on almost any Windows Mobile, Blackberry, Android, iPhone or iPad PDA or cell phone. The unique synchronization platform provides **real-time updates** over Wi-Fi or cellular networks

Time nHand is a complete Dynamics SL Project Time Entry solution. Full access to Project and Task list, regularly updated from the host Dynamics SL system.

Time increments can be set to 1, 5, 6, 10 or 15 minutes. Stop watch mode allows the user to mark the beginning and end of work and the stopwatch automatically calculates and inputs the elapsed time, complete with automatic rounding based on defined time increment.

Supports billable and non-billable time entry plus standard and over time. Optional user specified wage/rate input.

Daily time review enables easy review to ensure all eight working hours have been accounted for. 4000 character note capability per line entry for complete time documentation, complete with a list of predefined notes for rapid entry.

Timecards are brought into Dynamics SL ready for normal approval process through full SL client or BusinessPortal.

Expense nHand provides quick and seamless Dynamics SL Project Expense entry. Just like Time nHand, it provides real-time updates to/from the host Dynamics SL system with full Project and Task list access.

Fast entry of both billable and non-billable as well as employee paid and company paid expenses. When entering mileage only distance is required, Expense nHand automatically calculates mileage expense based on miles and mileage rate.

4000 character per line note capability with predefined notes.

Expense nHand utilizes your phone's built-in **digital camera** to capture and attach receipt images. No more keeping up with manual receipts. Receipt are images uploaded to SL database and can be easily reviewed with just the click of the mouse.

Expenses are brought into SL ready for approval through SL client or BusinessPortal.

The heart The heart of Time nHand and Expense nHand is the **powerful synchronization** engine that connects to the SL database via any available connectivity to the server, including: WI-FI, cellular, and docked to a PC. The engine synchronizes all new and changed information from the handheld device immediately on connection and then refreshes the handheld device with any new or changed information from the server; a complete exchange takes as little as one minute. Task-specific updates can be done from the field in the background during a documentation cycle, to keep the SL and mobile data matched.

Time nHand and Expense nHand can be purchased separately or as a bundle.
